# *Master List User ILS Certification Training*

Facilitator: Cindy Saylor

# *ILS Certification Form*

- The ILS Certification Form:
  - Ensures fully supported ILS products
  - Most expedient means for a SPM to fulfill its responsibilities to oversee all of the logistics aspects of alterations
- FMP/FRP provides guidelines and timelines

# *ILS Certification Form*

- An alt must be entered into NDE prior to development of the ILS Cert
- The ILS Certification must be certified by A-4
- The ILS Certification Form Preparation Guide is available as a tool

# *ILS Certification Form*

- Previously certified ILS Certs may be uploaded into NDE and do not have to be manually reentered
- Any changes to a certified ILS Cert will be a revision

# *Typical Roles*

- ISEA or  PY – Creates ILS Certs for equipment/systems under their cognizance.
- LCM/PARM
  - Approval of a cert for systems under their cognizance
  - Inherently has edit rights on any cert sent to them for approval.
- SYSCOM – Approval of a cert for systems under their cognizance

# *Typical Roles*

- SPMs (Carriers, Ships, Subs)
  - Certifying Authority for any Cert under their cognizance
  - Ability to Upload Legacy ILS Certifications into NDE.
- TYCOM
  - Approval Authority for ILS Risk Assessments.
- VIEW
  - Ability to View an ILS Cert

# *Certification Types*

- All Certifications Types
  - May include one or more hull.
- Class Certification
  - An ILS certification that has all products available in final form.

# *Certification Types*

- Hull Certification
  - An ILS certification that has all products available, except one or more products are not in final form.
  - Requires a monthly update message listing the status of final product.
  - Upon final completion of all products, a CLASS Certification must be submitted.

# Certification Types

- ILS Risk Assessment
  - Allows TYCOM to authorize an alteration installation without an approved Class or Hull ILS Certification.

# Preliminary Certification

- Use Prelim Cert
  - Create a certification for an Alt not yet in NDE.
  - Once the alt is entered into NDE, copy the Preliminary ILS Cert into a new ILS Cert.

# *Typical ILS Certification Approval Routing*

- Create ILS Cert
- Authorize editors/reviewers
- Submit to the appropriate LCM/PARM
  - Becomes the Cert Approval Submitter
  - Generates a Task and e-mails the LCM/PARM

(Note: Editors may submit a ILS Cert)

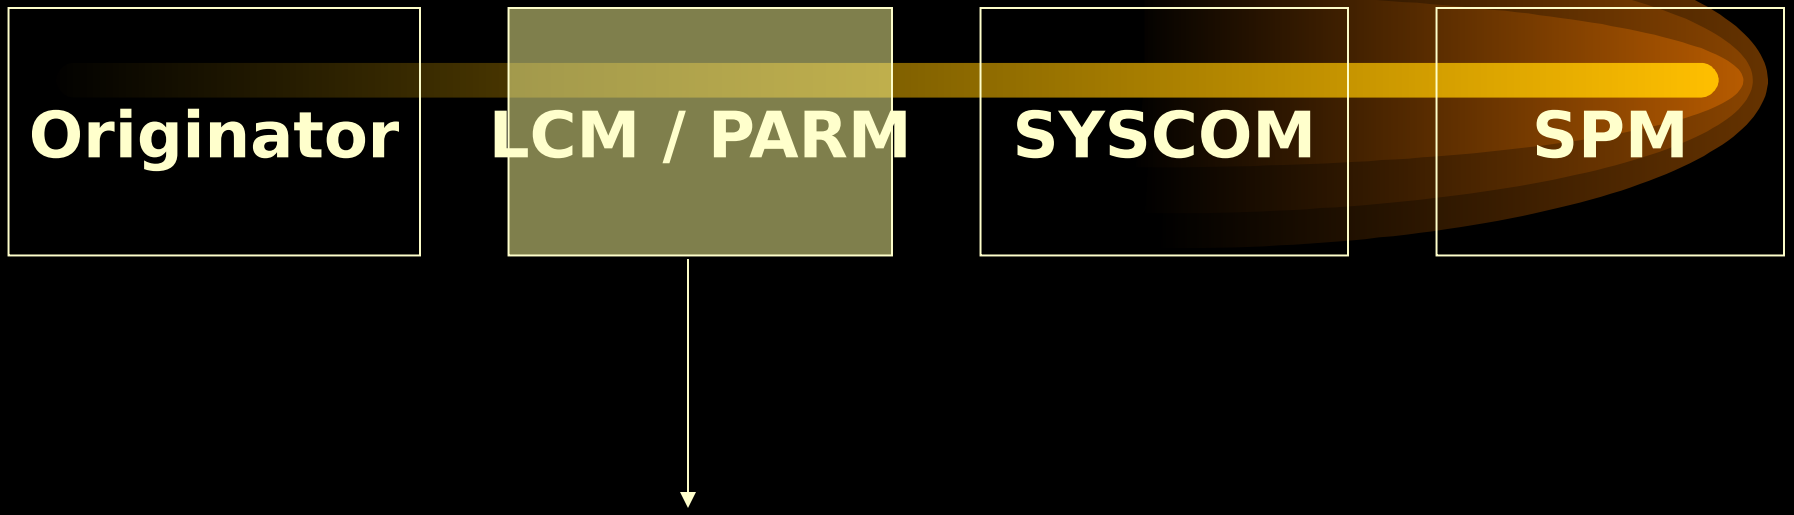

# *Typical ILS Certification Approval Routing*

- Concurs with cert and submits to the SYSCOM
  - E-mails Originator of action taken
  - Generates a Task and e-mails the SYSCOM

- Does not concur with cert
  - Submits back to the Originator
  - Generates a Task and e-mail to

# *Typical ILS Certification Approval Routing*

- Chooses to edit the certification
  - E-mails Originator of action taken
  - Submits, then PARM becomes Cert Approval Submitter
  - Details of the edit are not recorded.

# *Typical ILS Certification Approval Routing*

- Concurs with cert and submits to the SPM
  - E-mails Originator of action taken
  - Generates a Task and e-mails the SPM for certification

# *Typical ILS Certification Approval Routing*

Does not concur with cert

- Submits back to the previous reviewer
- Generates a Task and e-mail to LCM/PARM
- E-mails Originator, Cert Approval Submitter, and/or LCM/PARM

# *Typical ILS Certification Approval Routing*

Concurs with cert and certifies it

- Alteration certification status code changed to Certified.
- E-mails the Originator, Cert Approval Submitter, LCM/PARM, SYSCOM of the certification.

# *Typical ILS Certification Approval Routing*

Does not concur with cert

- Submits back to the previous reviewer
- Generates a Task and e-mail to SYSCOM
- E-mails Originator, Cert Approval Submitter, LCM/PARM, and SYSCOM

# *Business Rules*

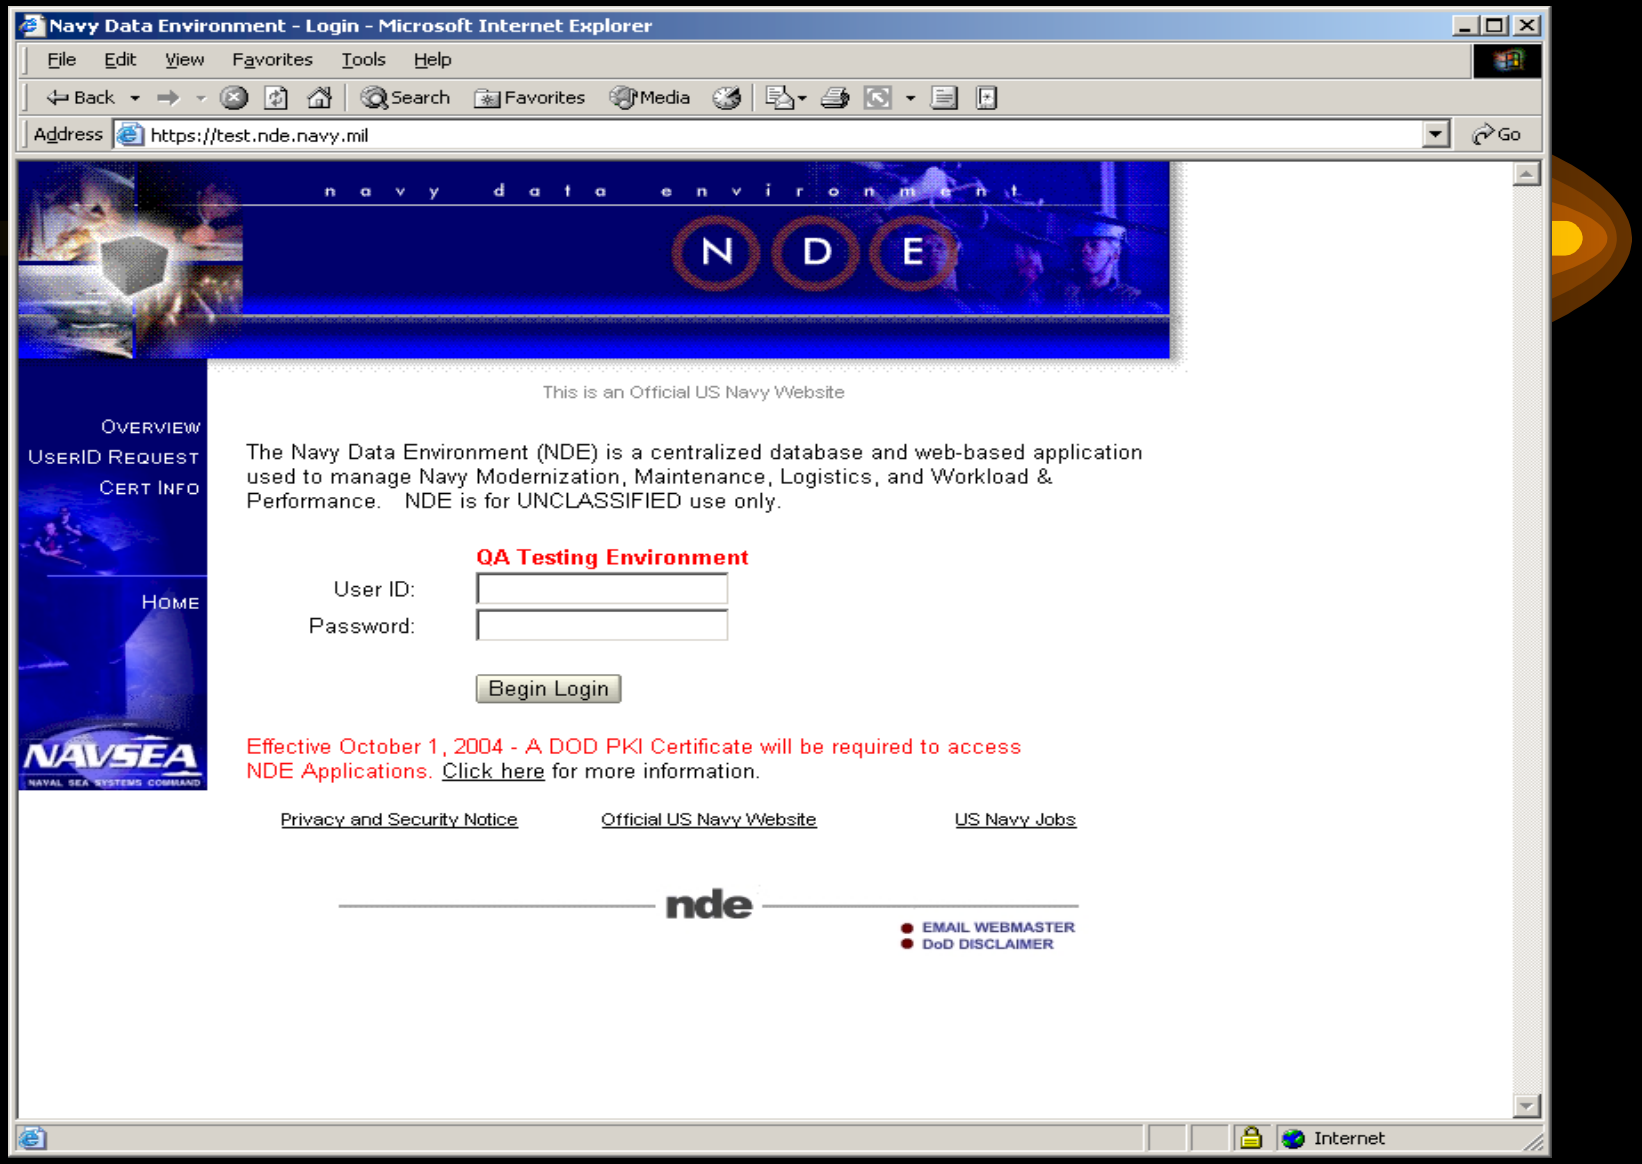

- Any change to an ALT requires one of the following:
  - Create a new cert.
  - Revise an existing cert  to add the alt.
- Multiple alts may be included on one cert based upon the SPM requirements

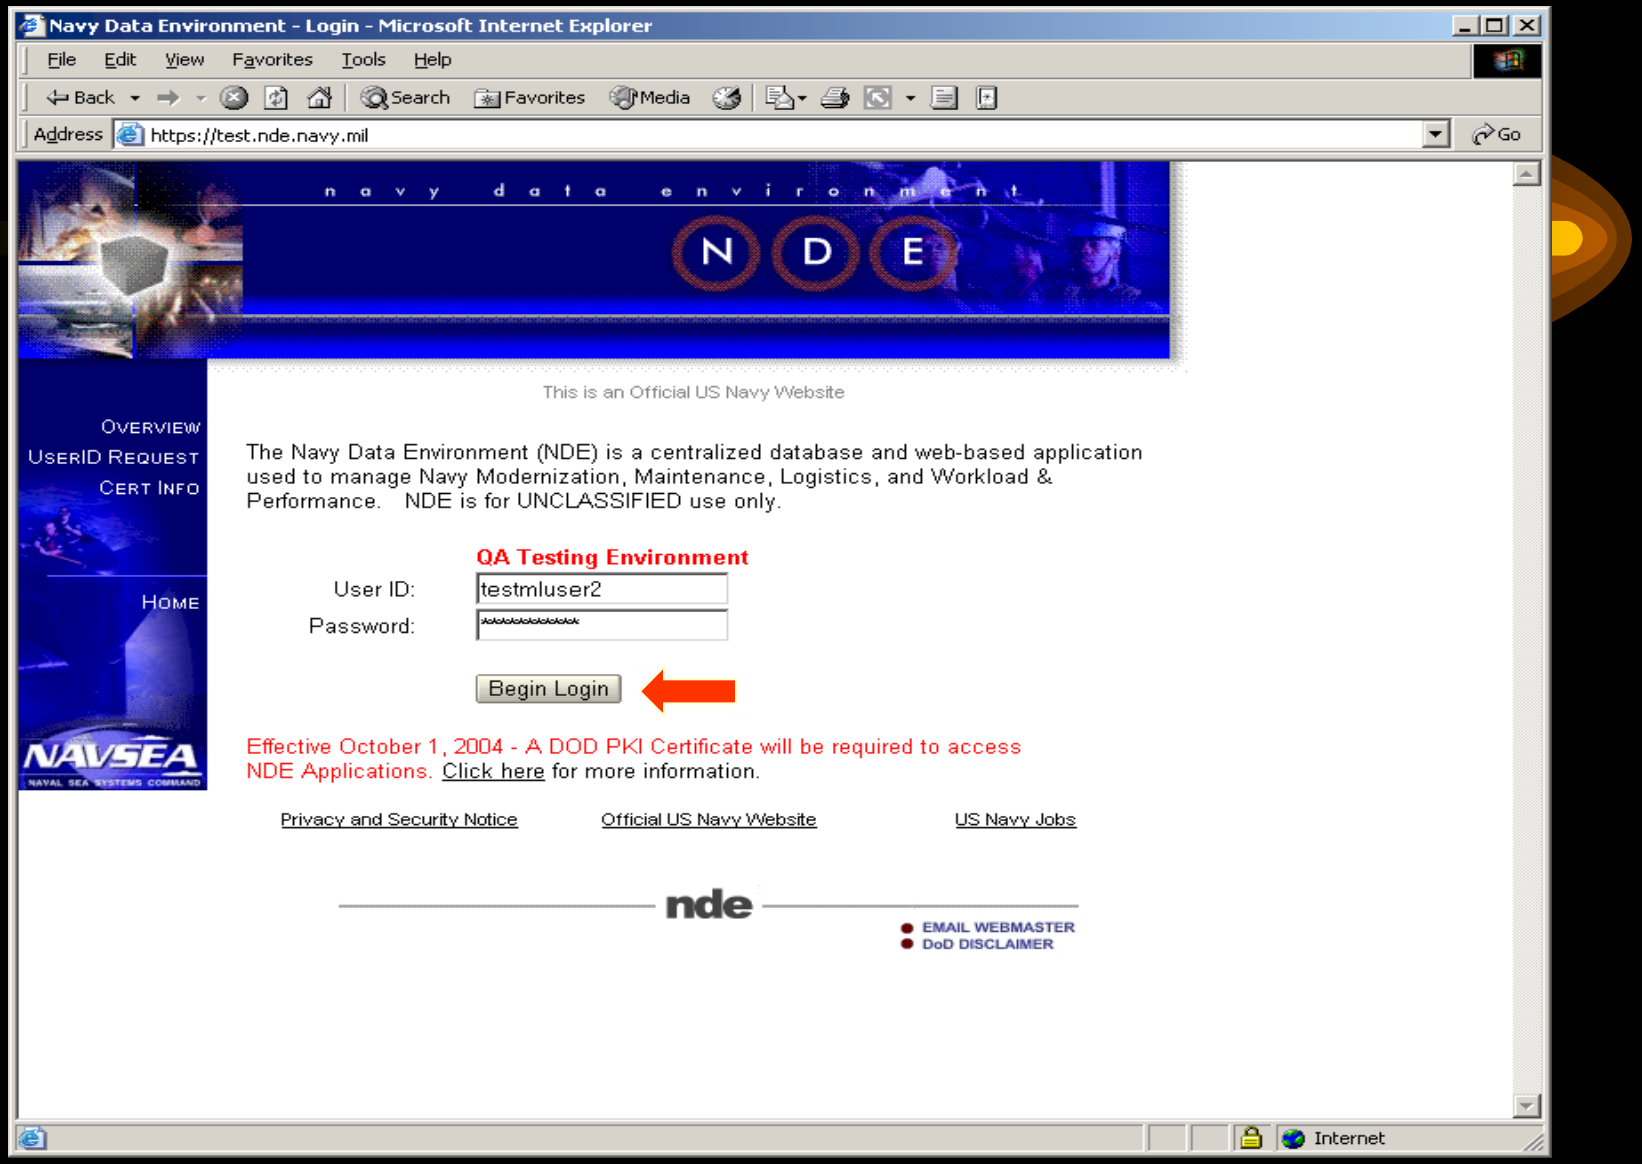

# *Business Rules*

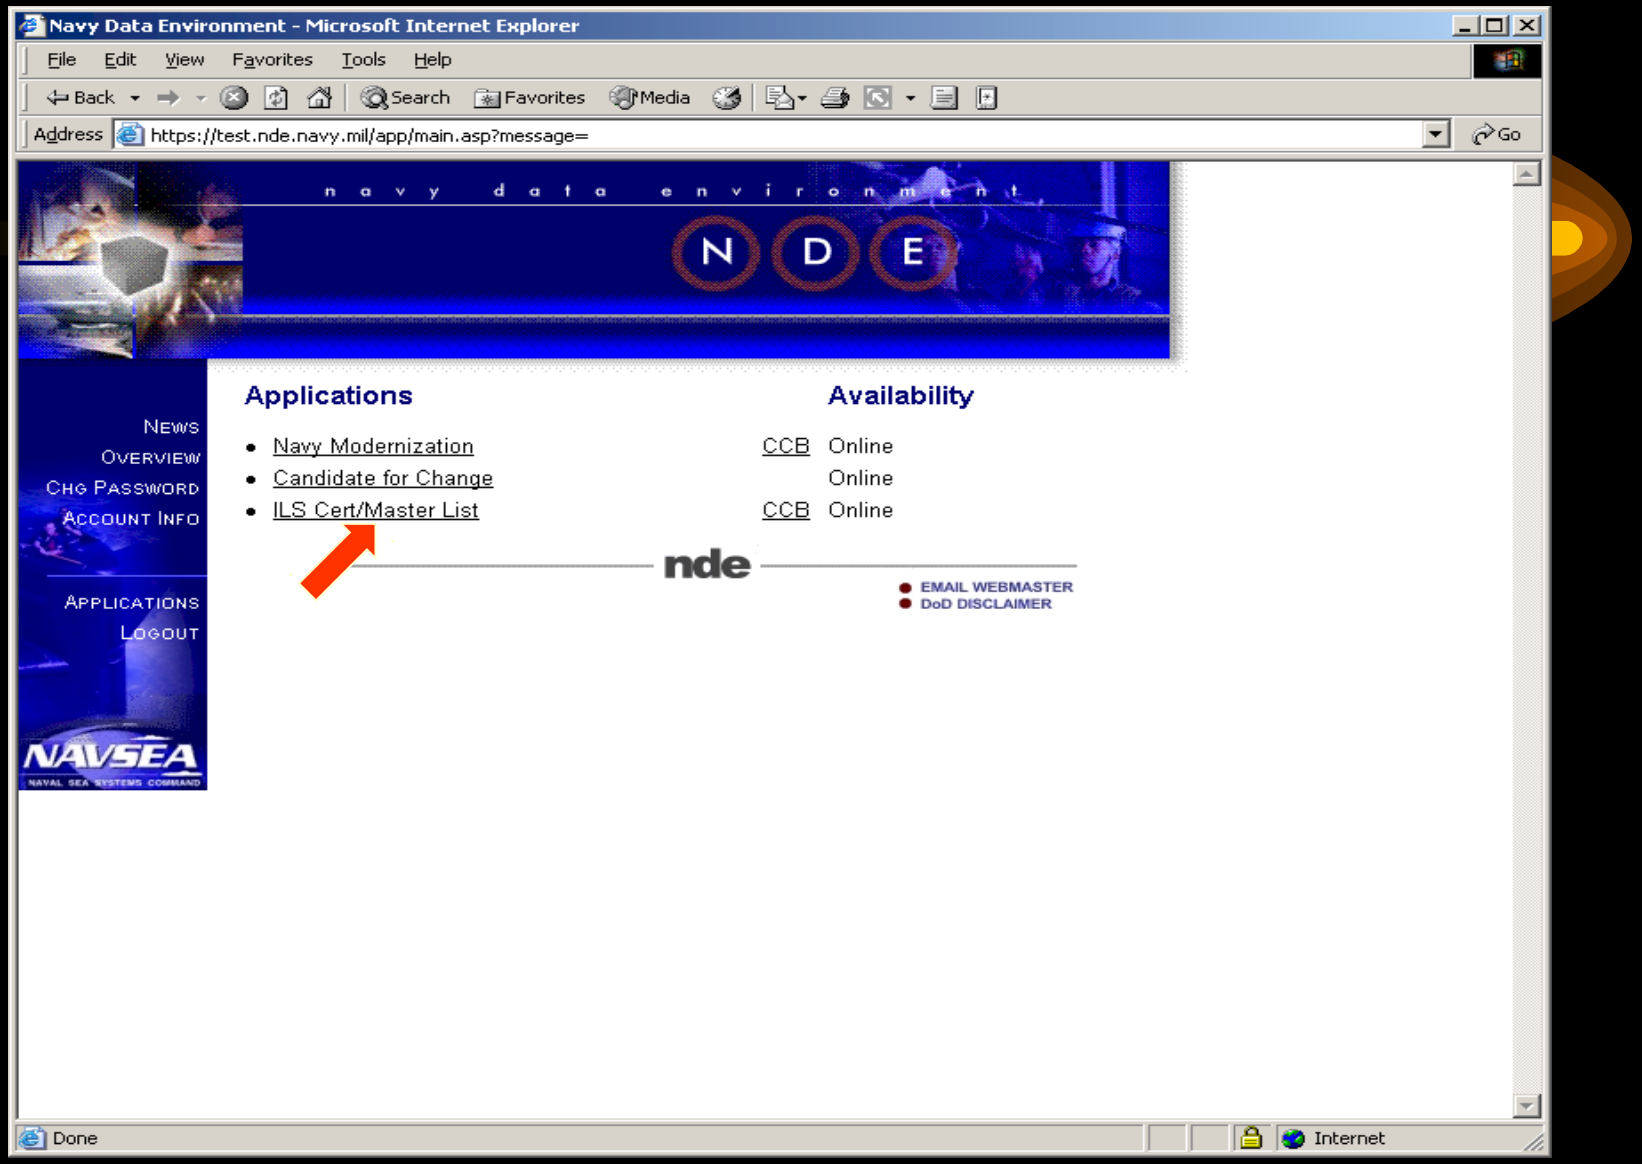

- Hull Applicability of Certifications
  - All ILS certifications must have one or more Hulls applicable.
  - The Hull must be applicable to the Alt.

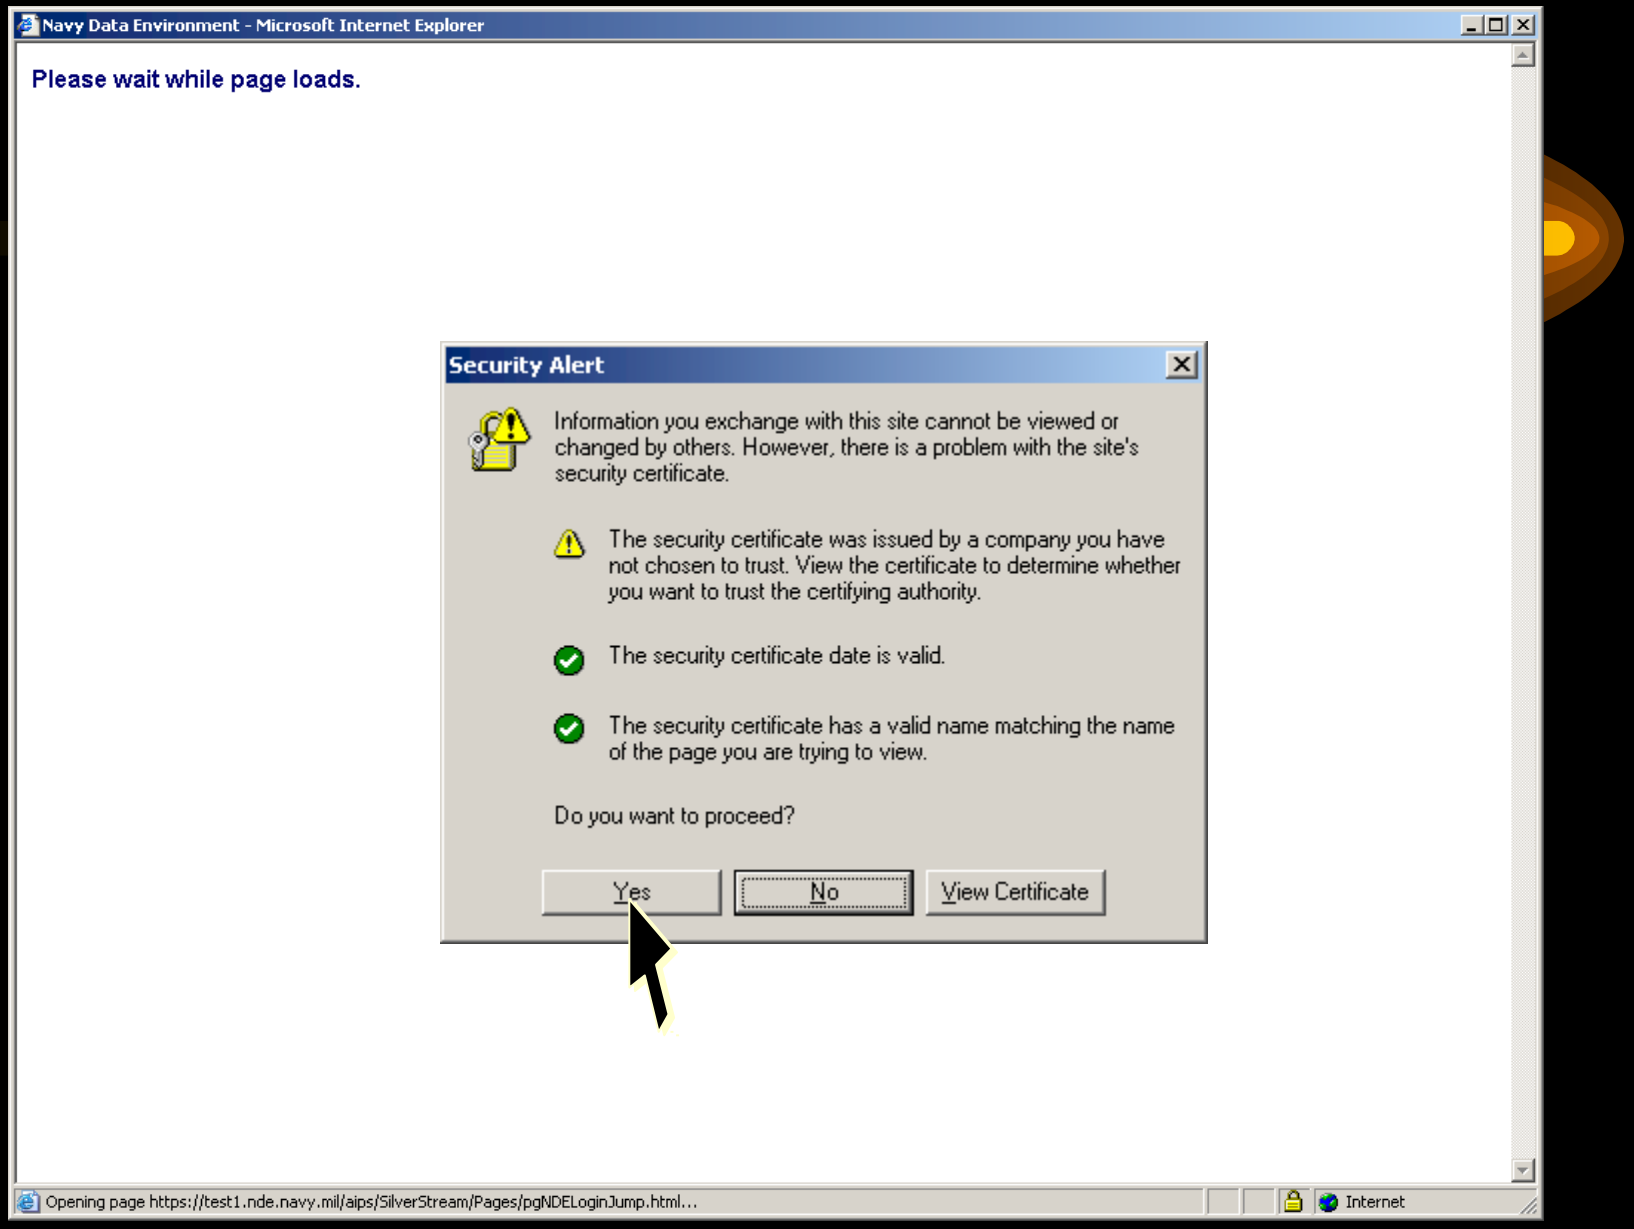

# *ILS Certification*

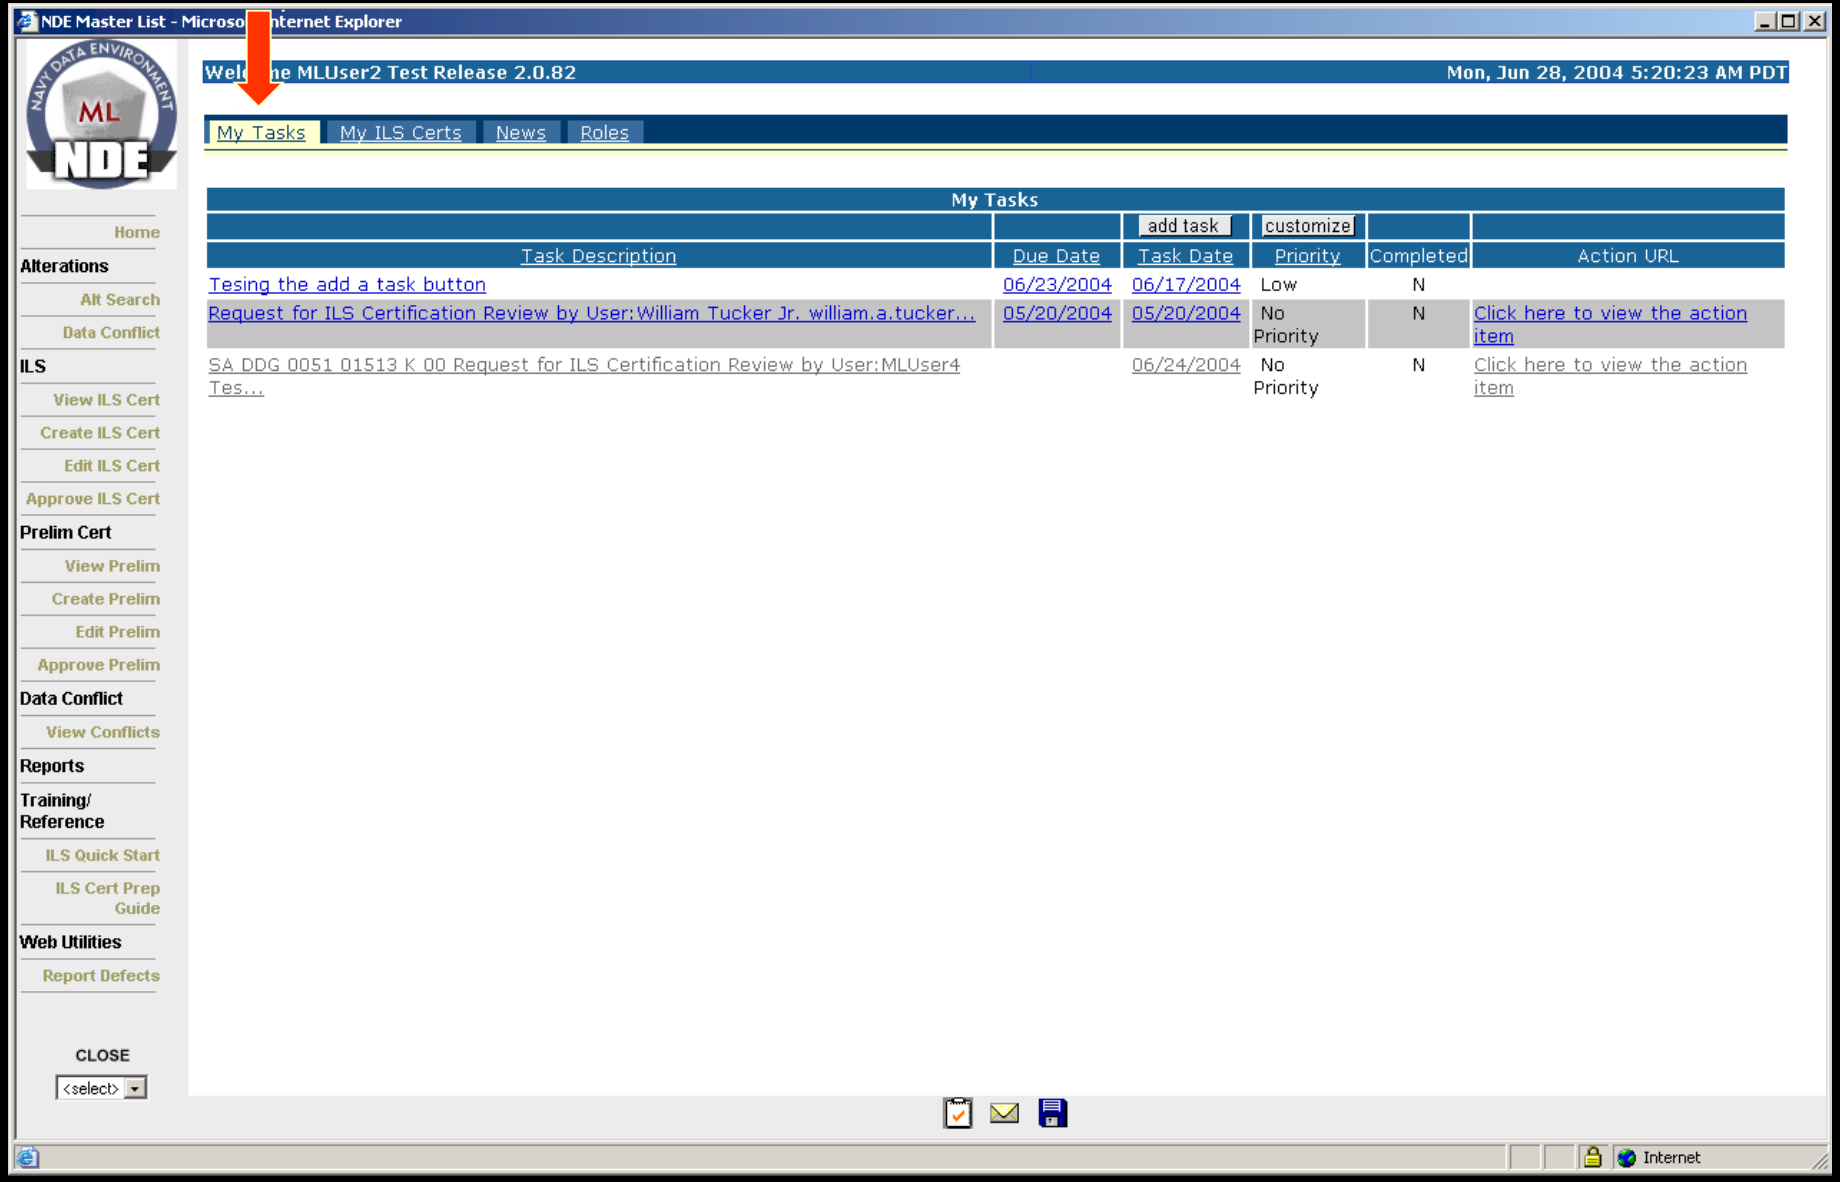

- Now let’s take a look at the application

# Integrated Logistics Support (ILS) Certification Preparation Guide
## Version 06.06.03

**Introduction.** This document is intended to be an informational guide to assist in the preparation of the ILS Certification Form. This version of the Preparation Guide supports Version 05.30.03 of the ILS Certification Form. A unique ILS Certification Form is required for first time installations of Alterations, Alteration variants, and changes to a ship class. A separate ILS Certification Form for the same Alteration **must** be submitted for each ship class unless the configuration and logistics products are identical for all installations. This ILS Certification Form allows for the identification of varying quantities of logistics products to be delivered based upon the capabilities of the specific platform. Changes to configuration items that impact Logistics products will require a revision to the approved ILS Certification Form. The Revision Number should be reflected in the Basic Header Data and the revised document should identify the new impacts and products and be readily identifiable by using the "Highlight" function of Microsoft Word to identify new or changed data. The purpose of the ILS Certification Form is to provide the Ship Program Managers (SPMs) with a tool to assist them in ensuring that all areas of ILS have been considered and that proper measures have been taken to ensure the planned Alteration is fully logistically supportable as directed by the CNO. This form **must** be submitted to the SPM in electronic format only.

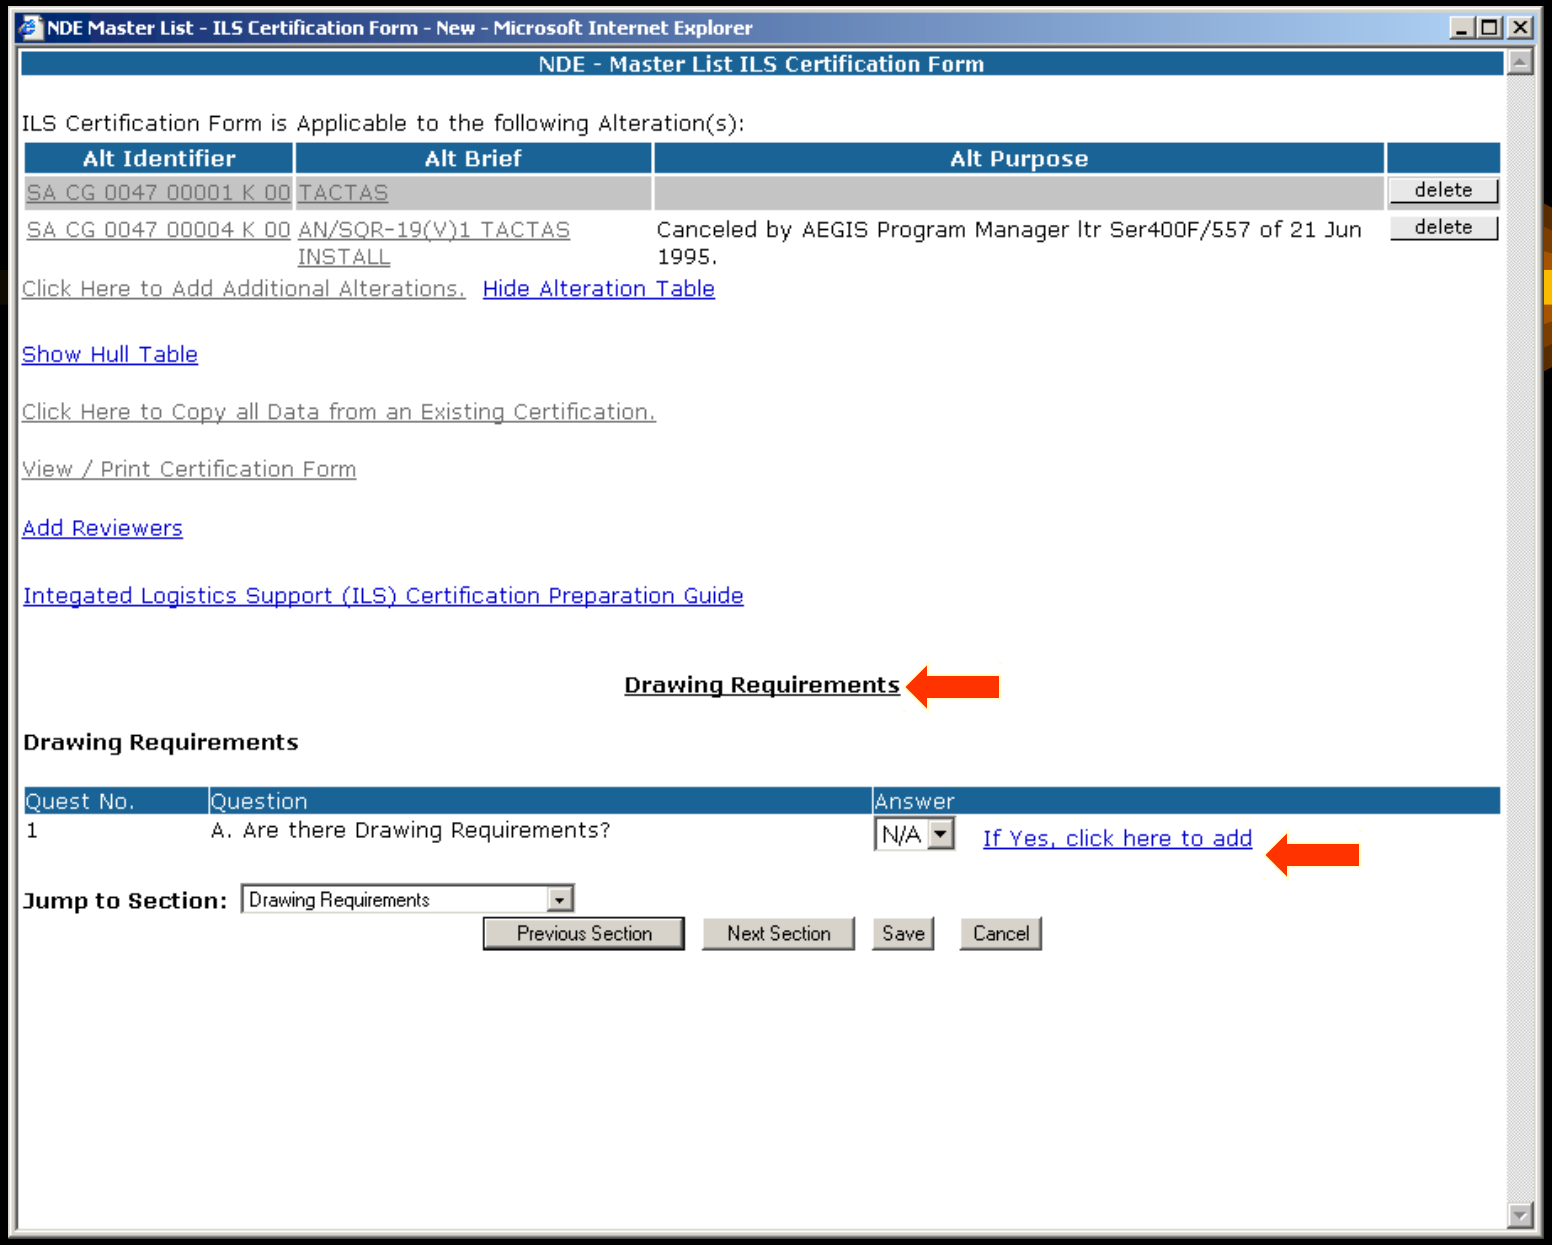

The information required in many areas of the form is self-explanatory based on the heading. However, in order to receive a consistent level of information, this guide is provided to give the preparer an idea of what is required in each block. Any sections that are not applicable to the Alteration should be marked "N/A" vice being left blank. Provide justification for "N/A" as appropriate.

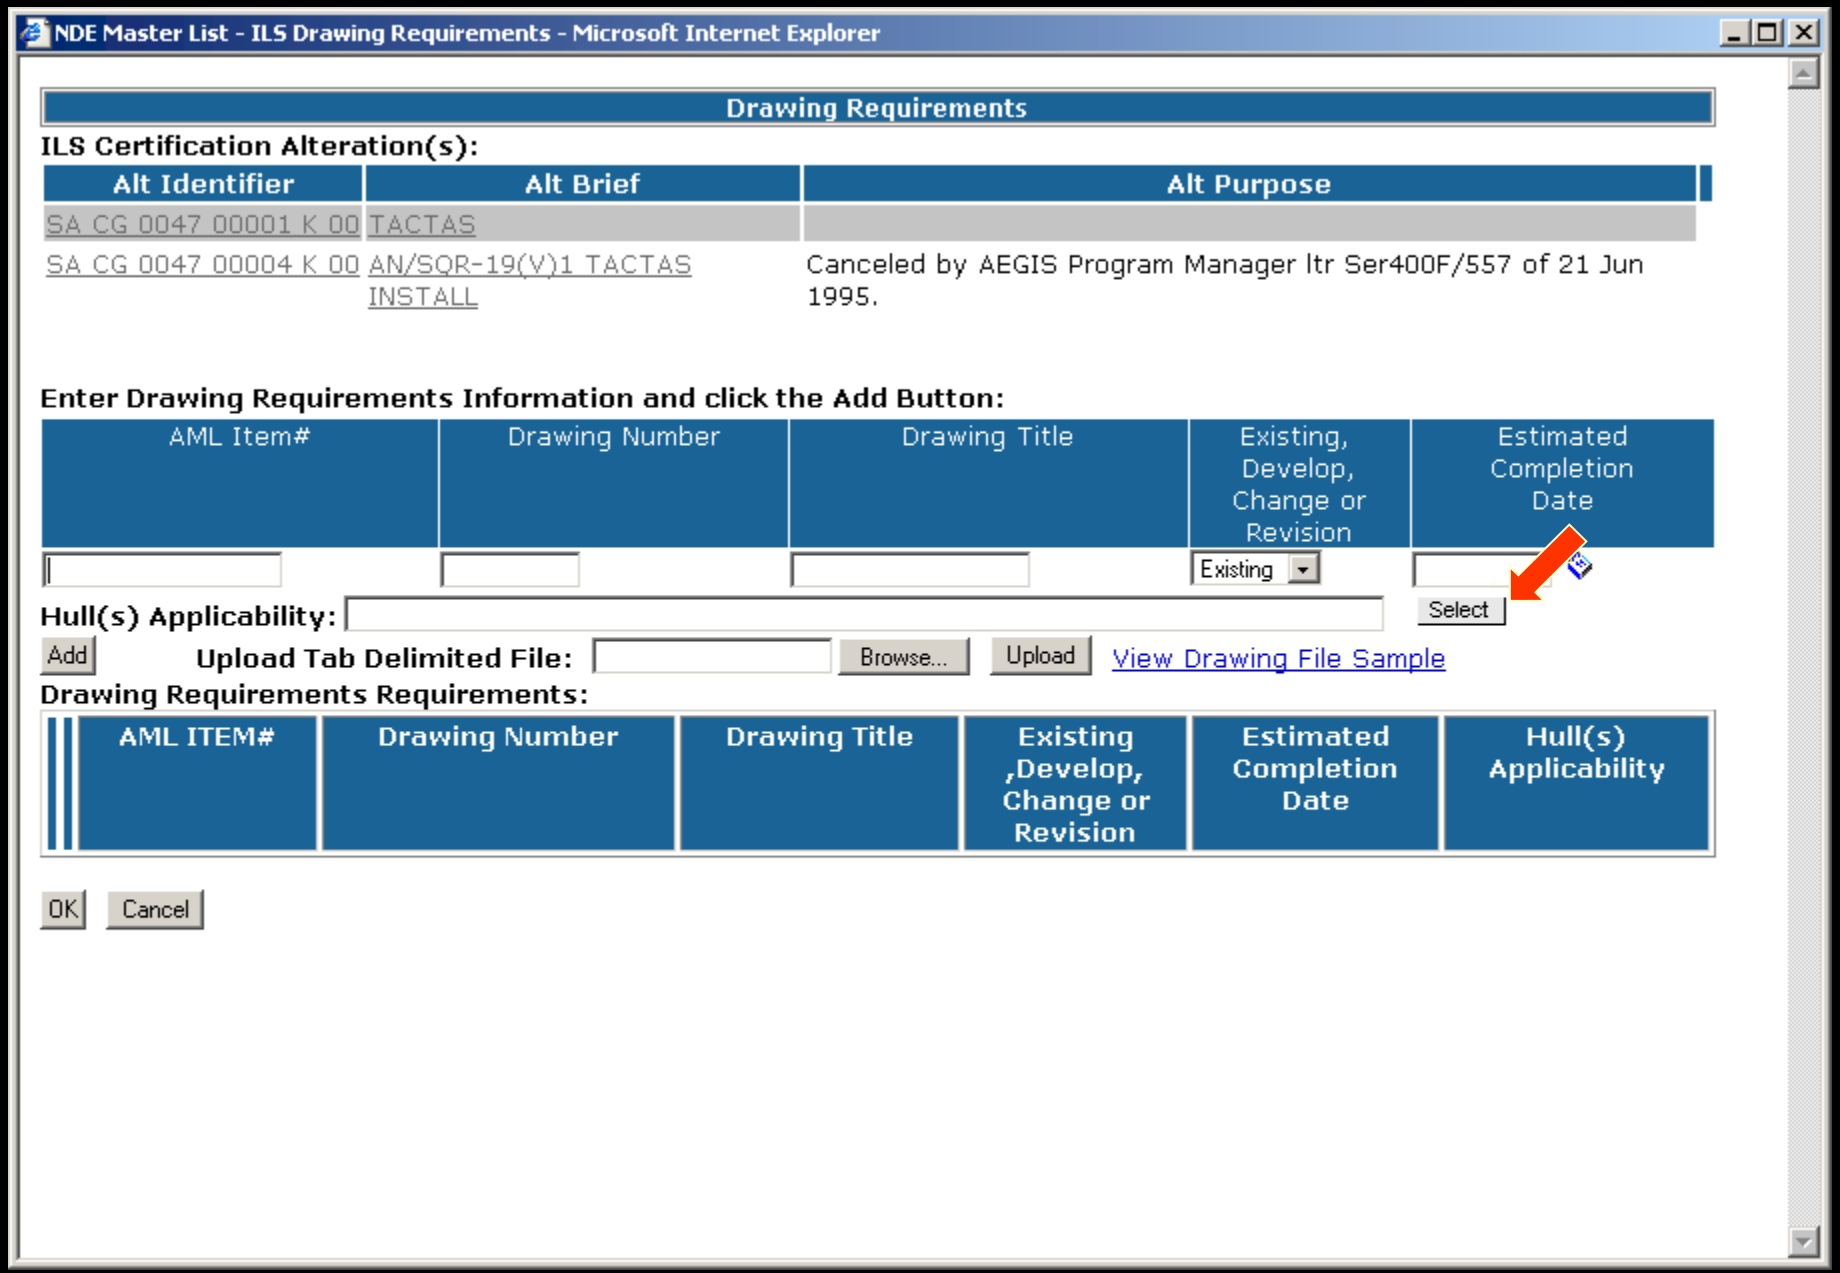

**General Guidance.**
This document is created as a Microsoft Word document. Data entry areas are created as "Tables" and it is preferred that all element information be listed in continuous rows in the document (i.e., the use of continuation sheets are no longer desired). If additional space is needed in the template to enter the required information (e.g., there are nine configuration items to identify but only five "Rows" for entry), additional "Rows" should be added by placing your cursor in the last row of the table, selecting "Table" on the Menu Bar, selecting "Insert Rows" and accept (press 'enter'). The 'Help' function in Word will identify how to insert more than one (1) row at a time.

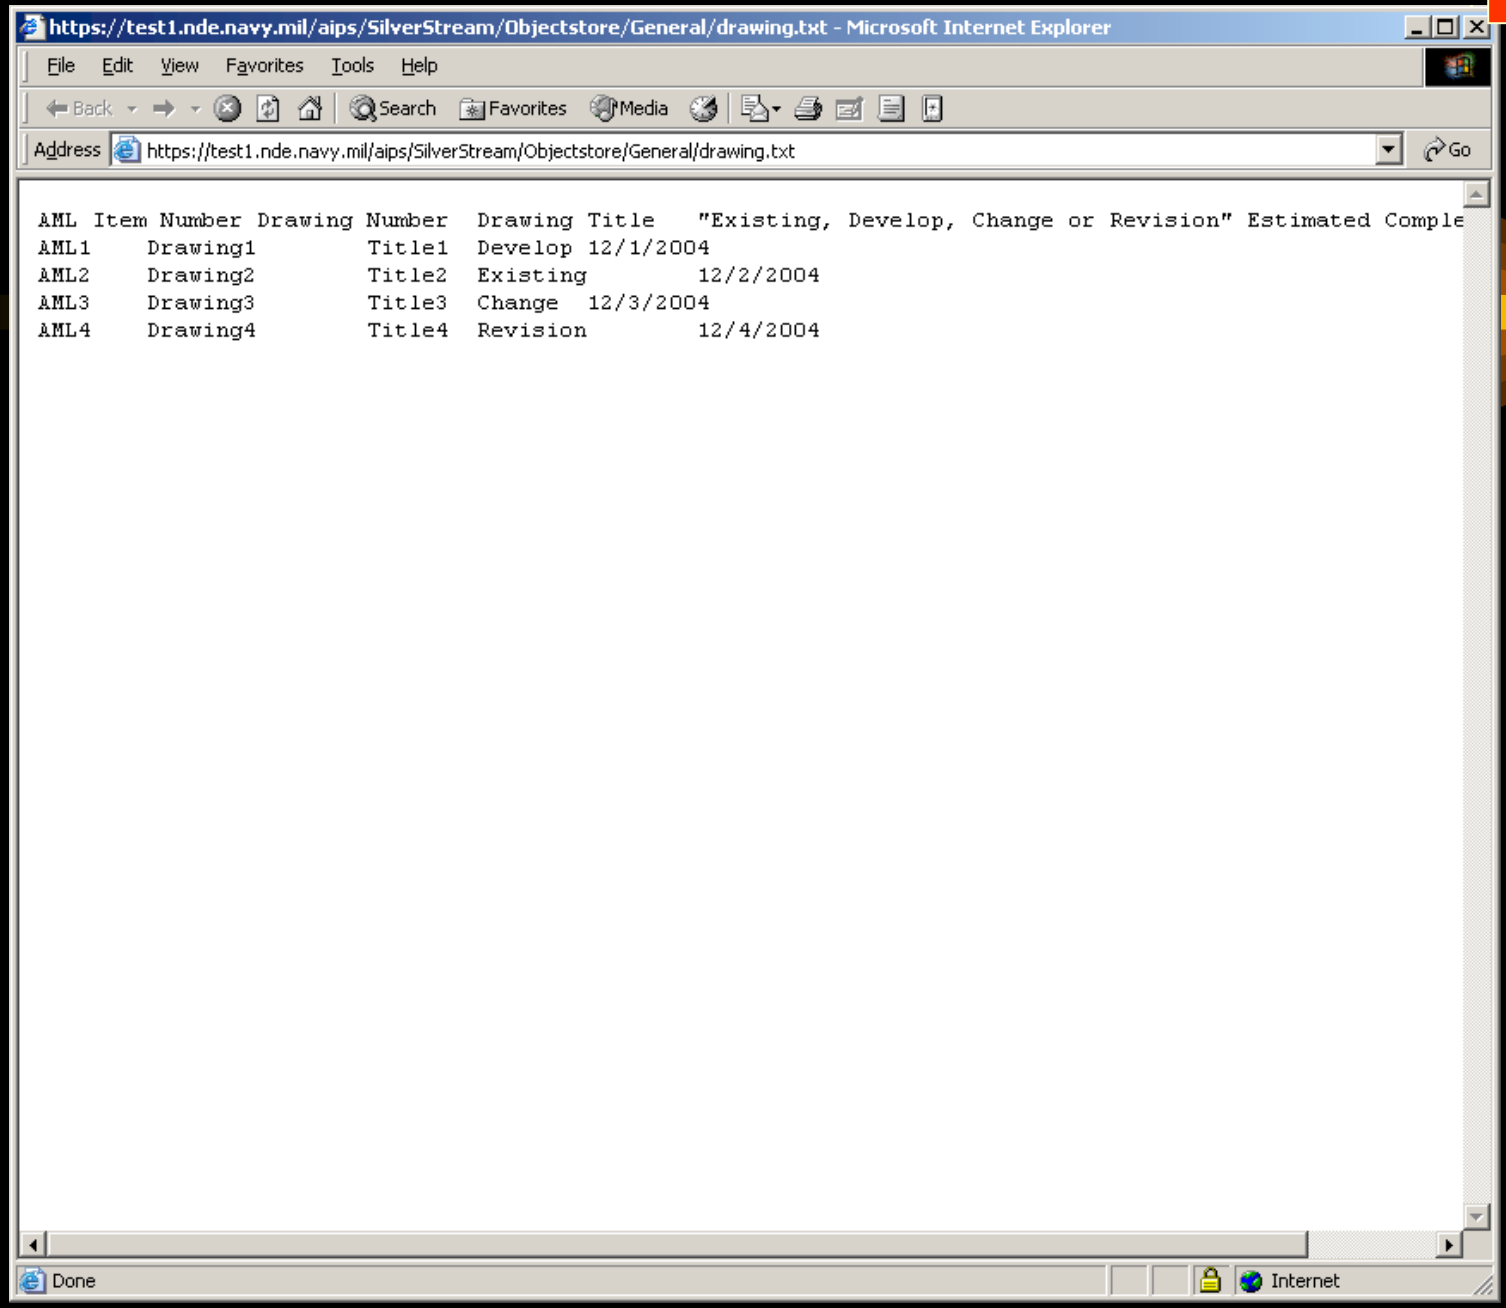

All "dates" should be entered in the MM DD YYYY format, e.g., 07 15 2001.

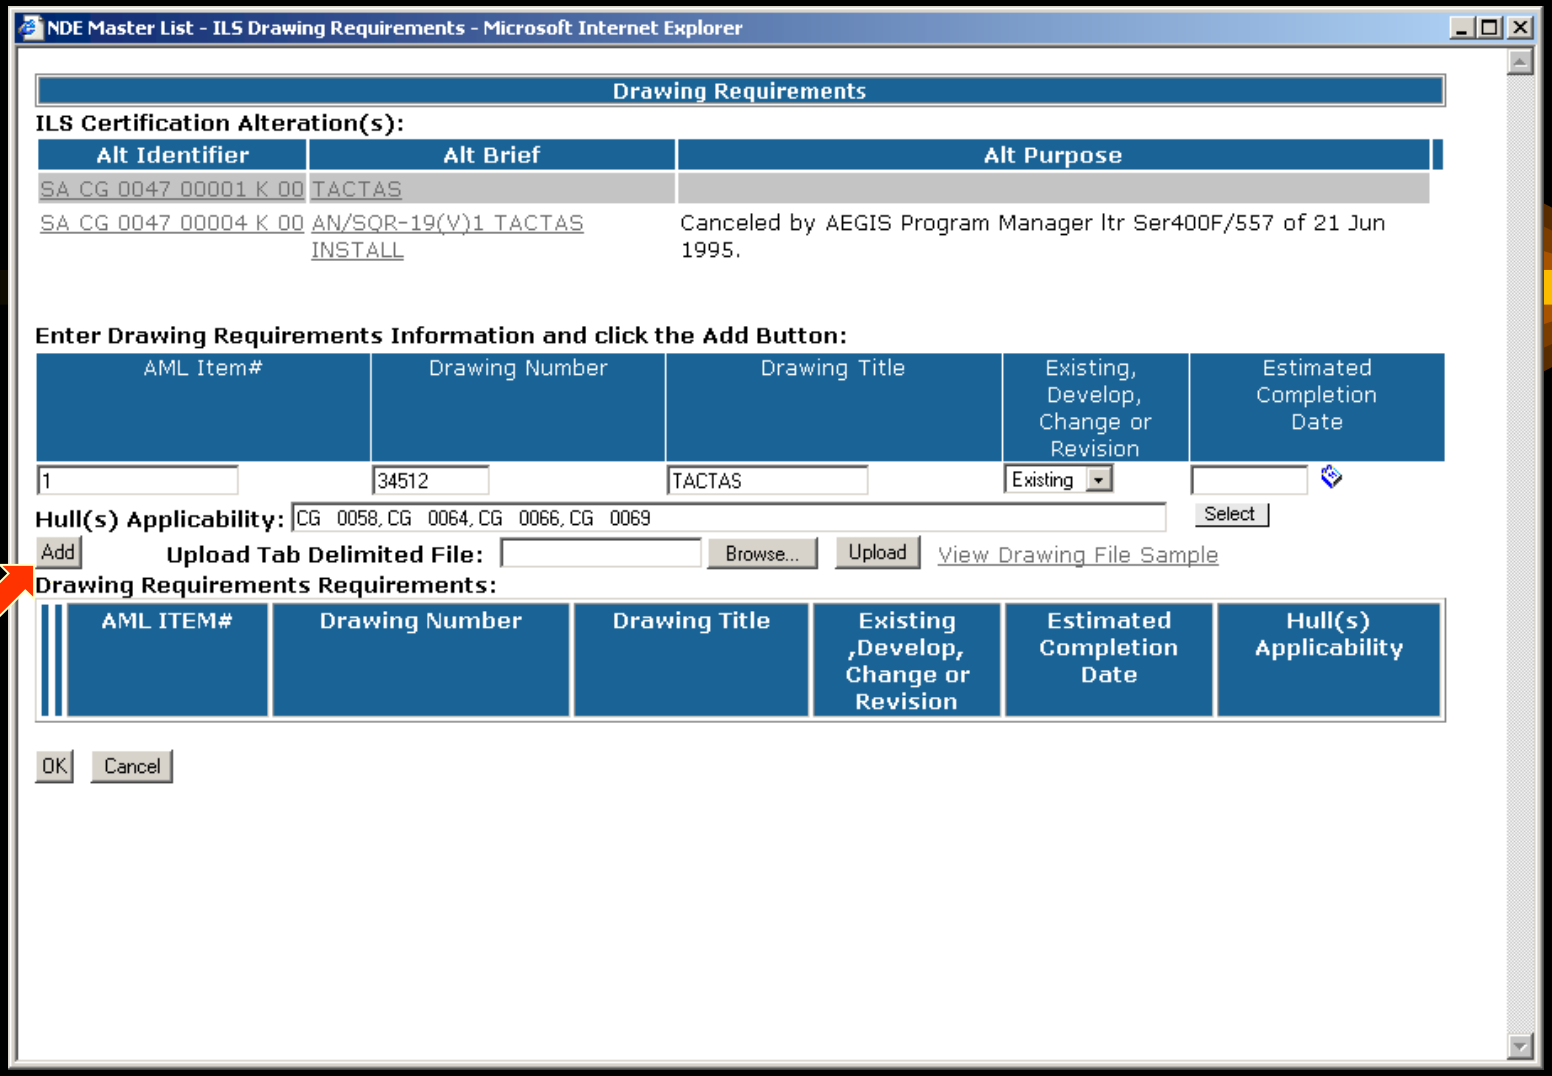

SHIPALT Installation Drawing (SID) number/SID Item Number may or may not be available at the time the ILS Certification is developed. The SPM will determine the need for this information to be collected.
